

SCRAP'AIR®

ERGONOMIC TOOL

SCRAPAIR.COM

WHY CHOOSING MABI?

MABI, THE REACTIVE AND TECHNICAL MANUFACTURER SINCE 1967

200M2 WORKSHOP

to manufacture, maintenance and repair.

TECHNICIANS, EXPERIENCED AND CONTINUOUSLY TRAINED

to answer to the specific requirements of users:
fast maintenance and technical assistance.

1000M2 STORAGE AREA

to allow for 80% of shipments within 24 hours.

200 REFERENCES OF MATERIALS

for the building trade, civil engineering and industry. Strictly selected regarding norms, needs and requirements of the sector.

STRONG PARTNERSHIPS WITH OUR CUSTOMERS

to improve our range concerning 5 main areas: ergonomics, safety, performance, profitability and design.

INGENIOUS SOLUTIONS WHICH ARE PROFITABLE

What makes all the originality of MABI ® products, it is to be interested as much in the user as in the work itself.

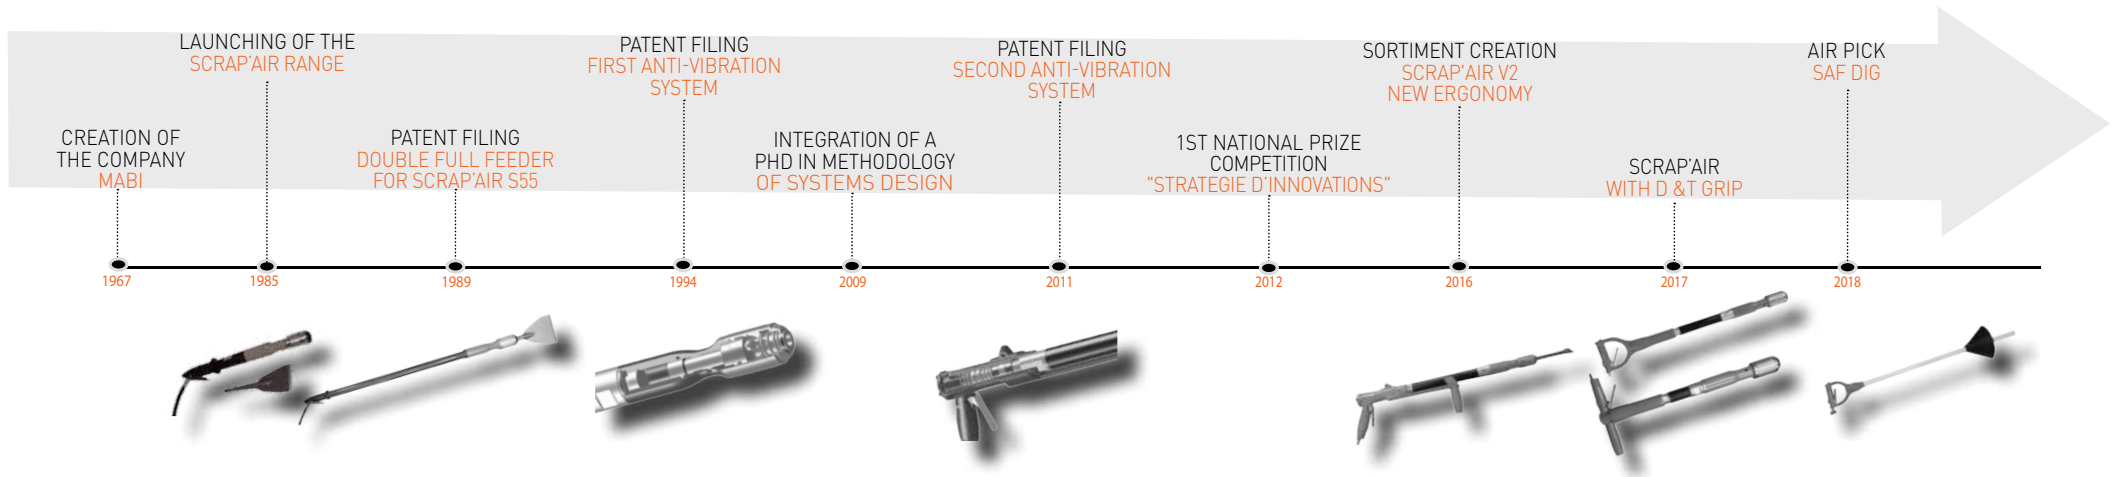

That means not only a reliable and performing equipment but as well easy to transport, to use and to maintain.

WHICH RESULTS IN A HIGHER PRODUCTIVITY AS YOU CAN NOTICE AT THE END OF YOUR WORK.

MORE THAN 50 YEARS OF INNOVATION

THE KEY DATES 1967-2019

• INNOVATION

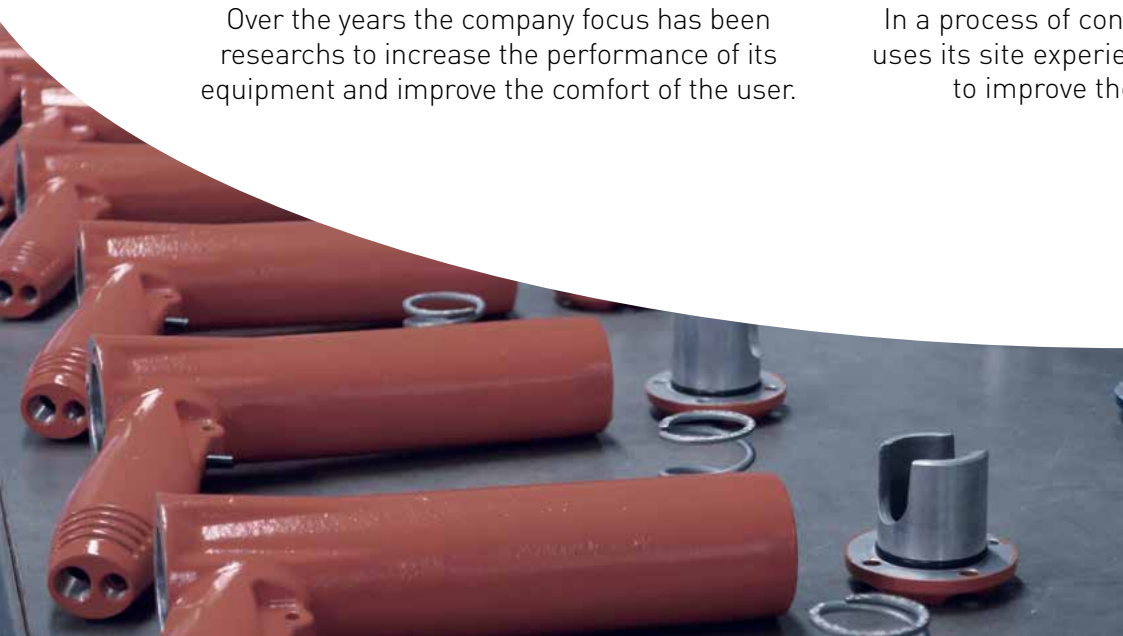

Over the years the company focus has been researches to increase the performance of its equipment and improve the comfort of the user.

• EFFICIENCY

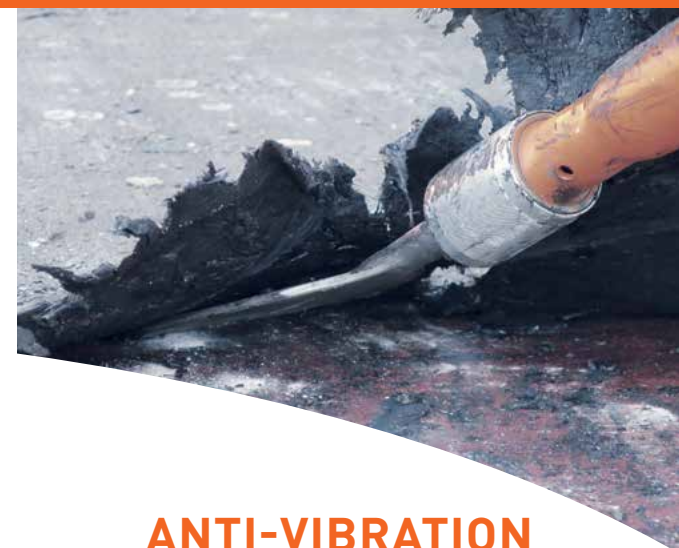

In a process of continuous improvement, MABI uses its site experience and technical know-how to improve the application methods.

• PROFITABILITY

A rigorous selection and complete ranges to save you time and money.

SCRAP'AIR BENEFITS: a range adapted to each project.

MAKE YOUR CHOICE:

4 POWERS

Use the adapted power according to the materials that need to be removed:

15 joules:

Recommended for fragile covering such as wood, stone, friable coats, ...
(Scrap'air 24 pages 7 -8)

25 joules:

Perfect for buildings renovations, asbestos, glues, tiles and slab removal, ...
(Scrap'air 36 pages 9 -10)

30 joules:

Adapted to industrial maintenance : ovens, mixers, truck mixer, ...
(Scrap'air 38 pages 11-14)

35 joules:

Suitable for floors stripping as water-proofing removal, excavation, ...
(Scrap'air 55 pages 15-18)

4 GRIPS

The ergonomic design of the different grips ensures optimal work positions.

Pistol Grip

Straight Grip

T-Grip

D-Grip

3 LENGTHS

The adapted handle length allows comfort during use and a secured handling (short, medium, long and tailor-made handle).

50 CM

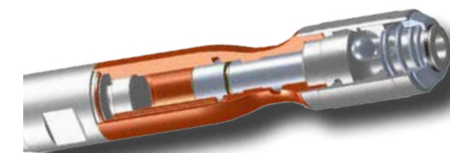

80 CM

120 CM

ANTI-VIBRATION SYSTEMS

The two patented anti-vibration systems, by dissociating head and handle, protect the user from vibration.

ANTI-VIBRATION IN THE NOZZLE HEAD

ANTI-VIBRATION IN THE HANDLE

LIGHTWEIGHT, HANDINESS, EFFICIENCY,

1. COMFORT AND PERFORMANCE

- > Respecting a certain distance from the impact field which protects from fragments and rubbles.
- > Respecting an angle of action which grants a comfortable positioning of the back in case of working on floors.
- > Giving a 2.5 m range allowing works on ceilings without any scaffolding.

2. PATENTED ANTI VIBRATION SYSTEMS

Reduces vibration in hands and arms up to 60% and grants therefore better using conditions.

3. SAFETY-TOOL RETAINER

Easy and safe plug-in of the tool.

4. TOOLS

A choice of 25 strong tools "Made in Germany" developed in cooperation with professionals.

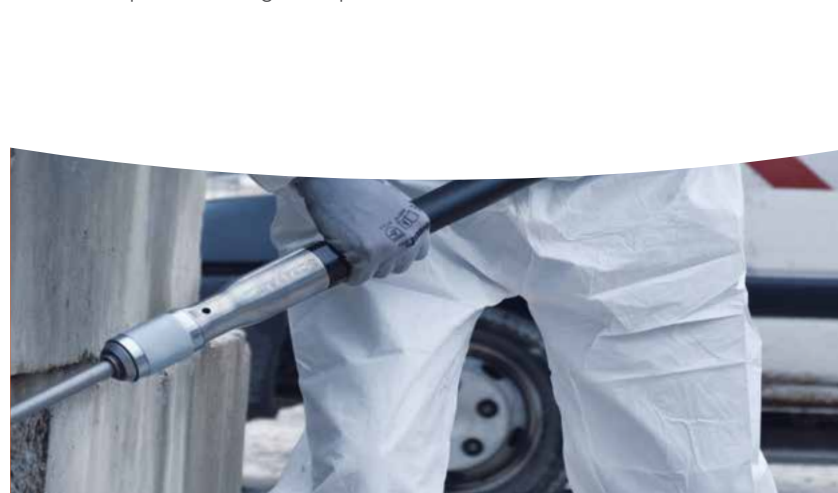

5. ERGONOMIC GRIPS

Ideal prehension adapted to all users. Grip made in light aluminum for optimum weight (from 3.1kg up to 6.8kg according to the model).

STAY AHEAD !

THE NEW SCRAP'AIR GENERATION HAS BEEN STUDIED AND PRODUCED WITH THE LATEST TECHNOLOGIES.

- Use high quality tools adapted to specific work.
- Benefit from machines with maximal long lifespan «made in France» with less maintenance.
- Work safely with high efficiency thanks to a proven range for professionals.

WHAT IS YOUR ACTIVITY?

LIGHT STRIPPING & DEBURRING

WOOD / FACADE / TANK / COAT / STONE / FOUNDRY PIECES / ETC...

SCRAP'AIR 24: Pages 7-8

Frequency: 4750 BLOWS/min
Air consumption: 210 L/min
Tools: Ø14 mm
(All insertion tools page 19)

BUILDING RENOVATION

ASBESTOS / TILES / EARTHENWARE / CARPET / LINO / GLUES / ETC...

SCRAP'AIR 36: Pages 9-10

Frequency: 3500 BLOWS/min
Air consumption: 250 L/min
Tools: Ø14 mm
(All insertion tools page 19)

INDUSTRIAL STRIPPING

MIXER / TRUCK MIXER / CONVEYOR / MOLDS / OVENS / FOUNDRY LADLE /
CONDUIT / PRODUCTION MAINTENANCE / GLUES / RESIN ETC...

Use
SCRAP'AIR S38
With a power of 30 joules!

SCRAP'AIR 38: Pages 11-14

Frequency: 2950 BLOWS/min
Air consumption: 280 L/min
Tools: Ø14 mm
(All insertion tools page 19)

FLOOR WORKS

WATERPROOFING / FIRE-RESISTANT COATING / RESIN / EXCAVATION / GRUBBING /
FOUNDRY LADLE / REFRACTORY COATING / ETC...

Use
SCRAP'AIR S55
With a power of 35 joules!

SCRAP'AIR 55: Pages 15-18

Frequency: 2250 BLOWS/min
Air consumption: 300 L/min
Tools: Ø18 mm
(All insertion tools page 20)

SCRAP'AIR 24[®]

SAF'DIG: AIR PICK

EXCAVATION IN URBAN AREA NEEDS SECURED WORK CONDITIONS DUE TO GAS AND ELECTRIC PIPELINES.

BENEFITS

Handling : appreciated asset on constructions sites, length only 125cm.

Lightweight: only 2.6kg for optimal work conditions.

Easy to use and powerful: the pneumatic jet is driven by the actuation of the secured trigger.

Effective up to 10cm. The guard cone protects the user against flying debris.

Resistance: long lifespan due to the quality of the material.

Tube with high electric isolation, robust grip, with no moving part, ...

Uncompressing and digging soils using the power of the pneumatic jet from air pick Saf'Dig allow :

- Pipelines release without damage,
- Users protection against risks linked to gas and electricity,
- Time saving and high reactivity in urban constructions sites.

AIR CONSUMPTION: 2000 L/min
TUBE DIAMETER: 3 cm
PRESSURE: BETWEEN 7 -10 BAR
ELECTRIC ISOLATION: 40 000 VOLT

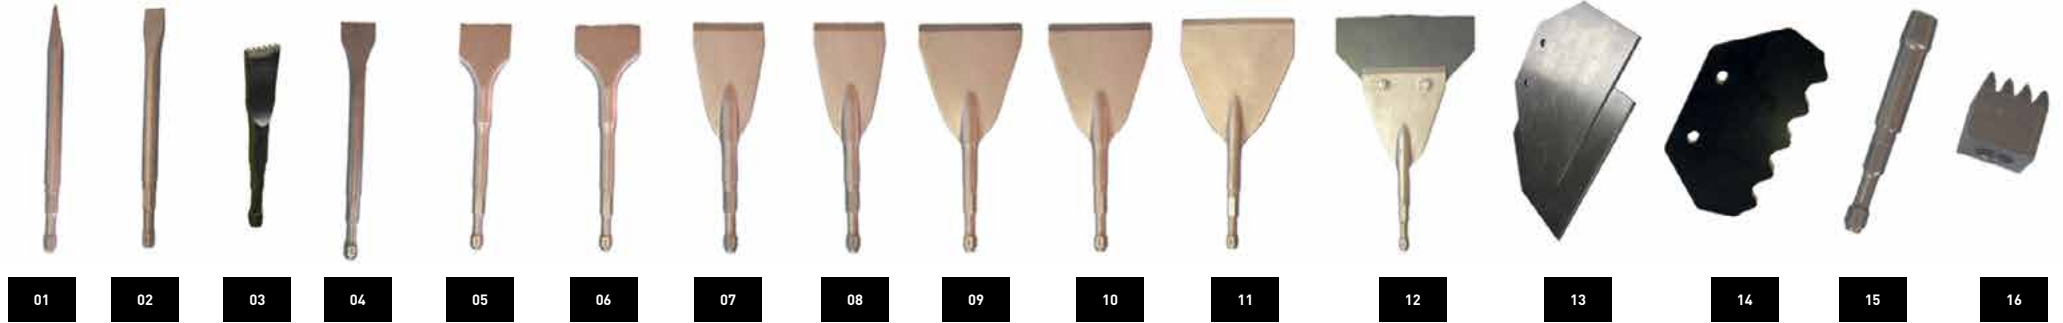

WEIGHT: 2.5 KG
LENGTH: 127 CM

07090000

AIR PICK SAF'DIG

25 TOOLS MADE IN GERMANY

FOR SCRAP'AIR 24,36,38 HEXAGONAL SHANK 14 MM

		Light demolition	Chiseling	Removing of very resistant coatings	Renovation	Removing of crumbling coatings	Removing of soft coatings	Rock work	Cutting of bituminous coatings	Wood working	Excavation	Tracing grooves	Removing parquet

07030191	16. Stocker 16 steel teeth							X					

HIGH QUALITY INSERTION TOOLS

The quality of our tools (Made in Germany) as well as their steady development is very appreciated by professionals:

- Tempered steel with high resistance for a longer life.
- Grit blasted surface to protect against oxidation.
- Hexagonal shank to limit the wear out.

The intuitive plug-in allows an easier, safer and faster changing of the tools.

According to his needs, the user will adapt the choice to the requested impact angle. Several applications for a single device.

- Low angle of impact with large and bent knives, to protect the base and remove crumbling materials.

- Wide angle of attack, thin and straight chisel to penetrate into the base (medium) and strip the hard and resistant materials.

FOR SCRAP'AIR 55 HEXAGONAL SHANK 18 MM

Scrap'air small hose)

08020061

HEALTH

The SCRAP'AIR® range offers a high reduction of vibration with its system patented by MABI®.

Musculoskeletal disorders (MSDs) cause most of the occupational diseases. Referring to these problems, many informing campaigns have been mobilized during the last years.

Improving working conditions by using the right device (light, ergonomic and with low vibration) minimizes the risk of occupational diseases.

The European Council Directives 2002/44/EC have fixed minimum vibration levels affecting hands and arms.

Thus, MABI® developed, in partnership with the UTBM, one of the most important French school for technical engineers, a new concept patented in 2010: a second anti-vibration system integrated in the handle, completing the one in the nozzle head.

The vibration has been reduced considerably. For example our SCRAP'AIR® 36 at the 3-dimensional tests executed by the French National Development-Center (LNE) resulted with a maximum vibration level of 6.05m/s².

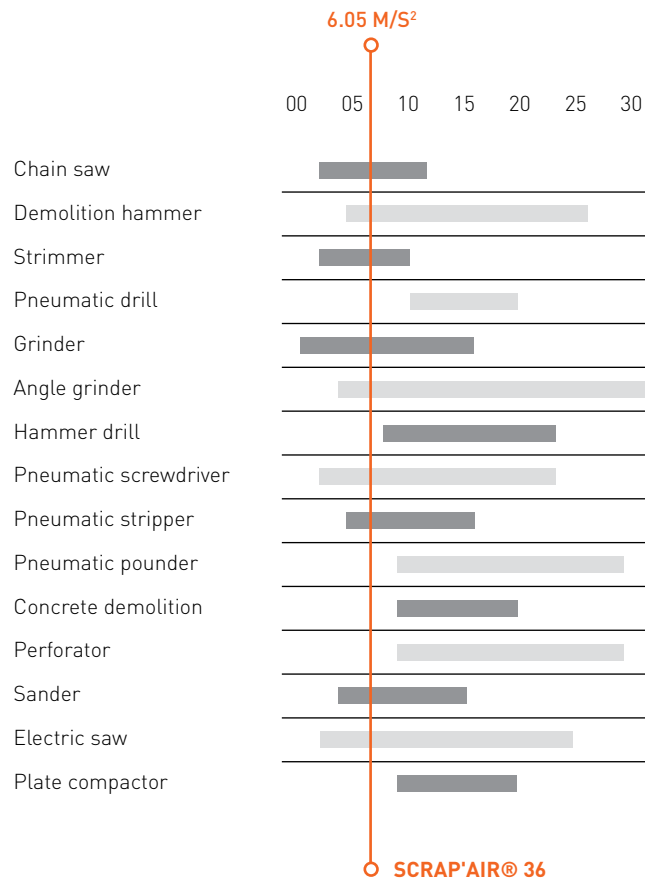

The graph opposite compares our Scrap' Air® 36 with other tools. (Extracted from a consultative guide of good practice "GUIDE DE BONNES PRATIQUES" in order to apply the European Council Directives 2002/44/EC related to the minimal hygiene and safety requirements for the employees' exposure to physical acting risks such as vibration).

EFFICIENCY

Tests we performed together with our customers on various construction sites confirm without any doubt the enormous level of efficiency given by the alliance between ergonomics and the power of our SCRAP'AIR®.

ESTIMATION OF RISKS

Comparison of vibration levels of common and authorised tools in the European Market.

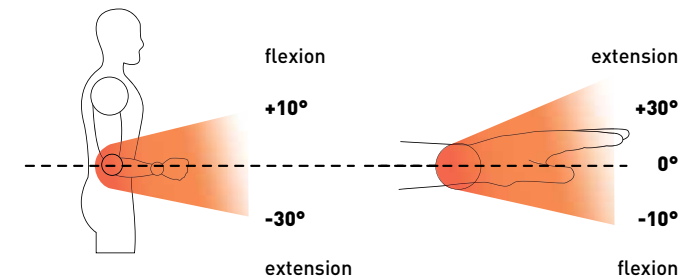

COMFORT

The results of MABI® observing users at work has allowed ergonomics and design to optimize comfort in the new range.

The concept of the new grip is a direct result of ergonomics that favours an optimal working position for comfort of the back, shoulders, elbow and wrist

Angles for comfort

EUROPEAN LEADER, PRESENT IN MORE THAN 30 COUNTRIES AROUND THE WORLD.
